! THIS COULD HELP YOU SAVE A LIFE

Did you know we have several defibrillators in the village? If you need to use one in an emergency **call 999** and the call handler will tell you where the nearest defibrillator is located and how to access it – you don't need specialised training. Adlington Town Council check their own units every week to ensure the batteries are still within their lifespan and replace any components required and any pads that have been used are also replaced.
